Business in this state is suffering enough!!!! Increasing the wage will result in less jobs and less expansion of business.  
Do any of you understand economics?????????  
We are spending more money on useless projects--busways---railroads---corporation welfare !!!!!!! We have one of the  
worst business climates in the country and you want to continue to put a stain on business???????  
We really need people in government that understand the economy.  
This administration certainly does not have that ability!!!!!!
